

## Computer center of the Hochschule Bremen (RZhsb)

The RZhsb develops, creates and operates the IT infrastructure of the University of Bremen and advises the users these structures. The main components are:

### 1. Server services

- > HISinOne (CampInO, QIS-POS)
- > Web server
- > Mail- and webmail server
- > Fileserver
- > VPN-Server
- > Network services such as DNS, DHCP, FTP
- > User administration and authentication
- > Service for exchanging large files

### 2. Operation of campus management systems

- > CampInO - Campus informationen online
- > QIS-POS - module registration and grades

### 3. User interfaces to the services

- > Change password
- > Activation of the user account for students
- > Vacation and forwarding
- > Development of new interfaces / services if necessary

### 4. Network

- > the campus-wide wired network (LAN)
- > the area-wide radio network (Wi-Fi) with participation in the global eduroam network
- > the connection to the German research network DFN (WAN)
- > the connection to Bremens regional administration network (MAN)

### 5. Data protection and data security

- > Sophos antivirus software
- > Spam protection

### 6. IT consultation and provisioning

- > for employees
